NOVA

We are a global project management company with a strong production capability

We plan, engineer, manufacture and implement anything related to corporate identity of global brands, in metal, wood and acrylic, in any environment, anywhere in the world. We are a proficient and reliable one stop solution partner for an impressive portfolio of highly respected clients around the world.

About Us

We are committed to provide outstanding quality, excellence in service, right-at-first-time implementation with a unique way of creating innovative approaches since 1978.

Besides our headquarters and factory located in Gebze, we established liaison offices in **Nurnberg, Baku** and **Ashgabat** to service our global clients. To serve our clients' local needs like survey, installation and after sales, we established a network of 25+ local partners around the world.

Our Differentiation Points

STRONG MANUFACTURING CAPABILITY

We operate in a state-of-art 50.000 m² production facility, one floor dedicated to signage and one floor dedicated to corporate furniture.

ONE-STOP SOLUTION PROVIDER

NOVA has the ability to process main raw materials such as wood, metal, acrylic as well as vinyl, lightning and digital printing applications in house, under one roof.

GLOBAL PRESENCE

Today, we operate in more than 90 countries globally, executed more than 50.000+ projects, has been a business partner for global brands in many different sectors. We push our limits to be the best among global and local competition.

40 YEARS OF EXPERIENCE

From a 60 m² atelier to a 50.000 m² state of art manufacturing facility, from five co-workers with a vision to 500+ team of professionals, from a start-up to a global player. We still hold our breath with desire to realize what we envision on the very first day in 1978.

VALUE ENGINEERING

Our vast experience with manufacturing enables us to provide ergonomic, aesthetic, economic, simple to install and maintain products. Our value engineering applications are the key to having the best optimized product that exceeds expectations.

PROTOTYPING

Prototyping is the backbone of product development. We fully recommend prototyping of concept models to ensure design integrity and higher performance.

MANUFACTURING

We operate in a state-of-art 50.000 m² production facility, one floor dedicated to metal and one floor dedicated to wood processing only. Our production facility utilizes the latest techniques, innovative technologies and quality control systems combined with a highly skilled workforce to provide our customers with high-end, top quality products.

LIFETIME CARE

Besides being committed to high standards of manufacturing and implementation, we undertake full responsibility to provide all appropriate warranties and after sales services for our products and services. In general, we provide a back to back warranty in respect of the raw material used in our products as the supplier provides for such raw material.

GLOBAL PARTNERS

We established a long-term, widespread business network with companies in more than 20 countries worldwide, so-called the “Local Network Partners (LNPs)”, that well understand the local requirements of the market and communicate in local language of the dedicated country.

SURVEY

Survey is not just about taking a measurement. We consider survey as an opportunity to see all obstacles that are on the way. By foreseeing all possible problems, we manage production and implementation process accordingly for higher customer satisfaction.

LOGISTICS AND CUSTOMS CLEARANCE

We are able to provide the best and most comprehensive logistics service via our partners around the globe. We utilize reputable logistic companies with regional expertise and warehousing capabilities, tailoring our services to our customers' specific needs.

INSTALLATION

We established a long-term, widespread local partners network in more than 20 countries worldwide for global installation and after sales services of our products. Our partners well understand the local requirements of the market and communicate in local language.

Tasigo Bademlik Hotel

A modern hotel room with a large bed, yellow armchair, and a view of a swimming pool through a large window. The room features a large bed with white linens and several pillows in shades of yellow and grey. A bright yellow armchair is positioned near a large window that offers a view of an outdoor swimming pool. The room is furnished with a small table and a chair near the window. The walls are decorated with large, colorful tapestries. The ceiling has recessed lighting.

A photograph of the Ritz Carlton Hotel in Moscow at night. The building is a grand, multi-story structure with classical architectural features, including columns and arched windows. It is illuminated with warm yellow lights, and the ground floor is highlighted with a red glow. A glass-enclosed entrance canopy is visible on the right. Several cars are parked or driving in front of the hotel.
